EDUCATION

FAST NUCES

Bachelor of Science, Computer Science

Coursework: Data Structures, Databases, OOP, Advanced Programming, AI Search Algorithms

Lahore, Pakistan
(2023 - Present)

Punjab College

Intermediate (ICS) — Total Marks: 895/1100

Lahore, Pakistan
(2021 - 2023)

EXPERIENCE

Web Intern — Fast Nexa, Lahore

July 2025 - August 2025

- Developed scalable REST APIs for a book management system utilizing Spring Boot, PostgreSQL, and AWS S3 for secure storage.
- Redesigned HRMS frontend layout, engineering responsive authentication flows and interactive dashboards with improved UX.

Game Developer Freelancer — Self Employed

January 2026 - Present

- Engineered modular 3D platformer mechanics including physics-based movement, combat systems, and NPC AI in Unity with C#.
- Designed and optimized a robust, persistent data save system to track player statistics and state management across levels.

PROJECTS

Campfire (*Next.js, FastAPI, LangChain, Google Generative AI, Supabase*)

- Architected full-stack RAG chatbot platform, connecting FastAPI microservices with LangChain pipelines and Google Gen AI models.
- Built API endpoints in FastAPI to send chatbot responses to the Next.js frontend instantly without making the user wait.

Vocal Canvas (*Python, librosa, CNN, TensorFlow, Streamlit*)

- Developed end-to-end speaker identification pipeline, converting raw voice signals into 2D Mel-spectrograms via librosa library.
- Trained a Convolutional Neural Network (CNN) in TensorFlow, achieving 80%+ accuracy, and deployed model via Streamlit app.

Arcade Play (*React, Node.js, Socket.io, REST API*)

- Built real-time, low-latency multiplayer gaming platform utilizing a modular React frontend and event-driven Node.js REST API.
- Integrated Socket.io web sockets to manage live game state synchronization, friend requests, and concurrent user sessions.

Limitless (*React Native, TypeScript, Supabase, Google Generative AI*)

- Developed cross-platform fitness app featuring workout logging matrices, metrics dashboard, and automated nutrition chatbot.
- Implemented TypeScript type safety across apps, managing authentication and secure data synchronization using Supabase.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C, C++

Frontend: React, Next.js, React Native, Tailwind CSS, shadcn/ui

Backend: FastAPI, Spring Boot, Node.js, REST APIs

Databases: PostgreSQL, Supabase, Firebase

ML/AI: librosa, TensorFlow, CNN, LangChain, Google Generative AI, Pandas

Tools: AWS S3, Socket.io, Streamlit, Git, Google Cloud

COMPETITIONS: CodeRush 2026 (ML Track) — DevSinc Devathon 2024 (Frontend Track)
